

TYPED REQUEST

question + workload
comparison + fixed context

action schema
knobs, edits, commands

constraints + metrics
legal states, units, scope

TOOL-CONNECTED ENVIRONMENT

wrapper

validate + translate request

tool

execute declared operation

invalid request

refused before tool execution

raw returned material

files, logs, reports, warnings
retained before interpretation

parser

structured fields + residual output
parse status

runtime outcome

tool failed / returned partially
/ returned completely

harness record

request + attempt/job identity + conditions + execution outcome
artifacts + parse status + realized cost + lineage
