

ARCHITECTURE QUESTION AND JUDGMENT

design intent
goals, risks, tradeoffs

architecture models
cost, latency, energy

requirements + rationale
scope, constraints, stakes

SCOPED ARCHITECTURE STUDY

study question
intended decision

scope + claim
under review

linked artifacts
methods + tool returns

supported finding
limits + named owner

revise claim or study

TOOL PATH

simulators / models

compiler / runtime

RTL / generators

EDA / signoff

measurements return

finding or architectural decision
