
MATCHED STUDY DEFINITION
Same architecture question and evaluator-owned evidence standard
declared starting artifacts and source access · shared evaluation tools · evaluator-owned acceptance checks
conditions · common cost-accounting window · budgets · stopping rules · reporting
Qualified expertise and all interventions are recorded; expertise is not assumed equal
AI-native complete workflow
COMPONENTS AND METHODS
model and version · retrieval · generation · prediction · optimization
STATE AND EXECUTION
design state · workflow tools and checks · human expertise and work
IDENTITY AND LIMITS
versions · permissions · expertise · material settings · interventions
Strongest practical complete workflow
PRACTICAL METHOD
human-directed study · established flow · heuristic or tuned optimizer
STATE AND EXECUTION
design state · workflow tools and checks · human expertise and work
IDENTITY AND LIMITS
versions · permissions · expertise · automation · interventions
Result record
• supported architecture outcome or declared failure
• stated limits, failed runs, repeats, and varied conditions
• setup, operation, review, repair, and recovery work
• model, tool, data, and elapsed time
Result record
• supported architecture outcome or declared failure
• stated limits, failed runs, repeats, and varied conditions
• setup, operation, review, repair, and recovery work
• model, tool, data, and elapsed time
PAIRED COMPLETE-WORKFLOW DIFFERENCES
Task-paired architecture outcome and total resource differences
complete-workflow effect · matching assumptions · uncertainty · tested envelope
PROGRAM CLAIM STATUS
supported · unsupported · unresolved
