
WORKSTREAM A: FOUNDATIONS
WORKSTREAM B: GOVERNANCE
WORKSTREAM C: EVALUATION
WORKSTREAM D: SKILLS & REVIEW
PROPOSAL 1
Open data schemas & tool contracts
• Open Agentic Interface
• SLSA attempt lineage headers
• Protobuf / JSON-LD schemas
• Tool-interface assessments
PROPOSAL 2
Open implementation & silicon access paths
• SKY130 manufacturable path
• ASAP7 predictive research
• OpenROAD / OpenSTA checks
• MPW shuttle evidence
PROPOSAL 3
Consortium governance & matched benchmarks
• MLCommons / SPEC working group
• Reference problem suites: 3 W XR, RISC-V RV64GCV, CXL & UCIe chiplet targets
• Closed division rules: locked wrappers + compute
• Open division rules: unconstrained surrogates
• Total workflow cost accounting: GPU hours + license minutes plus human triage time
PROPOSAL 4
Grand challenges & architecture contests
• Tracks beside ISPD / ICCAD contests
• Constrained PPA generation
• Sample-efficient DSE
• Red-teaming & SVA security
PROPOSAL 5
Public repositories of failed design attempts
• Unroutable floorplan logs
• Negative-slack STA reports
• UPF power domain conflicts
• Runs near feasibility limits
PROPOSAL 6
Workforce curricula & review capacity
• University curriculum pivot: formulation + verification
• Diagnostic fault-injection labs
• Autonomous Workflow Certified (AWC) conference badges
• Scoped workflow review
• Trained reviewers and appeals
Failed attempts inform surrogate calibration
