TYPED REQUEST
question + workload
comparison + fixed context
action schema
knobs, edits, commands
constraints + metrics
legal states, units, scope
TOOL-CONNECTED ENVIRONMENT
wrapper
validate + translate request
tool
execute declared operation
invalid request
refused before tool execution
raw returned material
files, logs, reports, warnings
retained before interpretation
parser
structured values + residual output
parse status
runtime outcome
tool failed / returned partially
/ returned completely
execution record
request + attempt/job identity + conditions + execution outcome
artifacts + parse status + realized cost + lineage
