authorized request
candidate + action + conditions
attempt
one authorized try
no backend job
invalid setup or refused admission
one job
common path
several jobs
or execution segments
execution record
all paths retain request, attempt, job or segment, and parent identity
returned artifacts
raw + structured + residual output
realized cost
including failed, canceled, and retried work
INDEPENDENT EXECUTION ENTRIES
scheduling state
pending / running / terminal
terminal cause
why execution ended
artifact completeness
expected files present
parser status
recognized + residual
cancellation confirmation
processes ended
licenses released
retry parent
linked prior attempt
